

Lab 2 Instructions –JavaScript Functions

CS 133JS, Beginning Programming: JavaScript

Overview

The objective of this lab is to give you practice:

- Writing functions
- Calling functions
- Linking to an external JavaScript file
- Using single line and multi-line comments

Part 1: Monroe Public Library

- Do the second part of tutorial 10, Session 10.2, on pages 708 through 730 of your textbook.
- Do the review project on page 731.

Part 2: Assignment Group A

Do Case Problem 1, SkyWeb Astronomy.

Submitting your lab work

1. Beta Version and Code Review
 - a. Zip the entire tutorial.10 folder, including the tutorial, review, and case sub-folders.
 - b. Post the zip file above in the *Lab 2 Beta + Discussion* forum so a lab partner can review it for you.
 - c. Review one of your lab partners' lab assignments using the Code Review Form provided and post the review in the *Lab 2 Beta + Discussion* forum.
 - d. Submit a copy of the code review above to the Lab 2 Code Review assignment.
2. Production Version
 - a. Based on the review and helpful advice from your lab partners, you may revise your code. On the code review you got from your lab partner, fill out the "Production" column to show what you revised.
 - b. Submit the following to the *Lab 2 Production* assignment:
 - i. Your zipped Tutorial folder from Part 1
 - ii. The code review from your lab partner (after you have completed the "Production" column)
