

Code Review for Lab 3: JavaScript Selection

CS133JS, Beginning Programming: JavaScript

Developer's name (person whose code is being reviewed)	
Developer's Assignment group (A, B, or C)	
Reviewer's name (you)	
Date:	

Instructions

Use this form to review the beta version of a lab assignment completed by one of your lab partners. After completing this review form, upload it to the Beta Review Forum on Moodle so your lab partner can read it. Also submit it to the Lab Code Review assignment.

Part 2: Web Page I: Age Calculator, or		
Criteria	Beta	Prod.
Are the developer's name and date in a comment in the head element of the HTML page?		
Is the code that does the calculation in a function in a separate .js file?		
<i>In the script element in the HTML page:</i>		
Are all variables declared using <code>let</code> ?		
Are there prompts to get input?		
Is output written to an HTML element referenced using <code>getElementById</code> ?		
<i>In the JavaScript file:</i>		
Is all of the code inside a function?		
Are all variables declared using <code>let</code> ?		
Are the appropriate selection statements used?		
<i>Functionality</i>		
Does the browser console show any errors for the JavaScript code?		
Is the correct output shown? (check for correct results at all the "boundaries")
